ABSTRACT

SIMS 50 papers must be typed according to this description. The description specifies which font faces and sizes to be used, page layout and how to sort figures, tables and references.

The title, author list and abstract of the paper should be centered in one column. The content of the paper should be in two columns.

A list of key words should be included at the end of the abstract.

Keywords: Document layout, SIMS 50

NOMENCLATURE

A nomenclature should follow the abstract as the first section of the paper. It should be listed in alphabetical order.

- a* A symbol [kg]
- z* Another symbol [m]
- ε Greek letter may be put last [s]

INTRODUCTION

SIMS 50 papers must be typed according to this description. The description specifies font faces and sizes to be used, page layout and how to insert figures, tables and references.

The title, author list and abstract of the paper should be centered in one column. The content of the paper should be in two columns.

A list of key words should be included at the end of the abstract.

PAGE LAYOUT

The maximum length of the paper is 8 pages. The paper format should be DIN/ISO A4 paper. We reserve the right to collect a page fee of \$50 per page for extra pages.

Running text

The running text should be written in two columns centered on the page. The column width should be 80 mm with 8 mm separation. The top and bottom margins of the page should be 30 mm. The text should be justified between the left and right margins.

Headings

The title of the paper should be lowered 15 mm from the page top margin. Title, author(s) and abstract should be horizontally centered on the page. The abstract should be indented 8mm from both margins. The paper title, author information and abstract should not extend below 18 cm from the top of the page.

*Corresponding author: Phone: +45 4525 4169 Fax: +45 4593 5215 E-mail:be@mek.dtu.dk

The corresponding author should be indicated by an asterisk and a footnote indicating phone, fax and e-mail data.

FONT FACES AND SIZES

The paper should be written in Times New Roman according to the following table:

TITLE	14 pt, bold, upper case
Author	12pt, bold
ABSTRACT HEADING	11pt, bold, upper case
Abstract text	11pt
SECTION HEADINGS	11pt, bold, upper case
Subsection headings	11pt, bold
Running text	11pt
Footnotes	9pt

In addition, any text distinction, e.g., as in a description list should be written in italics to avoid confusion between such and headings. A list should be written as in the following example:

First item This is just for exemplification

Another item This is just for exemplification

An interesting item This is just for exemplification

SPECIAL TEXT ITEMS

Figures and tables

Figures and tables should be included in the manuscript. They should be included in camera-ready form

Both figures and tables should be numbered successively and have captions beginning with Figure or Table, respectively. Examples of each are Figure 1 and Table 1.

Top	of the	Table
A	Hello	b
1	2	45

Table 1: An example table

Mathematical Equations

Mathematical equations should only use the symbols defined in the nomenclature. The equations should be numbered successively with the numbers

Figure 1: An example figure

right-aligned. An example:

$$\frac{\partial f(x)}{\partial x_i} = \ln \left(\sin \sum_{j=1}^n x_j \tan(j)^2 \right) \quad (1)$$

MORE TEXT

Below follows a bit more example text to show the layout:

Background

Together, the Technical University of Denmark, Aalborg University, University of Southern Denmark in cooperation with the conference main sponsor DONG Energy, and The Danish Simulation Society are arranging SIMS 50 – the 50th Conference on Simulation and Modelling 7-8 October 2000 in Fredericia, Denmark.

The purpose of the conference is to cover broad aspects of modelling and simulation of energy technology and planning. It will be of interest for model builders, simulator users, scientists, engineers, vendors, etc. The scientific program will include technical sessions with submitted and invited papers, and is open for poster sessions and vendor demonstrations. Presented papers will be considered for publication in the EUROSIM scientific journal “Simulation and Modelling – Practice and Theory” published by Elsevier Science.

Especially Ph.D. Students are encouraged to contribute with papers according to the conference themes. We will try to make a number of scholarships available for Ph.D. students' participation in the conference.

Important Dates

1 February 2009 Submission of Abstracts

1 March 2009 Notification of acceptance of Abstracts

1 May 2009 Submission of paper for review

1 June 2009 Comments from scientific committee

1 August 2009 Camera-ready manuscripts

1 August 2009 Deadline for Early Registration

7-8 October 2009 Conference

REFERENCING OTHER WORKS

All publications cited in the text should be presented in a list of references by a number in square brackets on the line, and the full reference should be given in a numerical list at the end of the paper. The order is determined by their first reference in text.

References should be given in the following form:

A journal is referenced as [1].

A book is referenced as [2].

A report is referenced as [3].

A chapter of a book is referenced as [4].

An article in a conference proceedings is referenced as [5].

Material found on the internet should be referenced carefully, for example as [6] or [7].
